Tropical Storm Nicholas Operational Alert

Dear Valued ONE Customers,

We have received the following information from the National Weather Service:

The Satellite picture shows Tropical Storm Nicholas has become better organized, farther north than expected. The storm will come ashore later this evening near Matagorda Bay. The storm still has a possibility to reach hurricane strength before landfall. The greatest threat from this storm shall be heavy rainfall, with localized flash flooding. Moderate flooding along the entire Texas coast is expected, with 3-5 feet at Freeport. Seas of 6 feet are already being recorded, with peaks of 10-20 feet tonight. Sustained 30+ knot winds within 20 miles of Galveston later tonight.

Port & Terminals Status

Port Locations	Facility Status	Port Status
Houston	<p>Closing at 3pm-Port Houston container terminal ingates will close today, Monday, September 13 at 3:00 pm CT.</p> <p>All terminals including Barbour’s Cut and Bayport container terminals will be closed Tuesday, September 14 in the morning. A possible noon reopening will be announced by 6 pm this evening. Vessel operations will be suspended at 1500 today.</p>	<p>Port Condition Modified - YANKEE 1200/13 -this will prohibit all inbound ship movement</p>

USCG Port Conditions:

- **WHISKEY:** A heightened condition in which gale force winds are possible within 72 hours. All commercial vessels and barges greater than 500 gross tons and all ocean-going barges and their supporting tugs shall report to the Coast Guard Captain of the Port their intention to depart or remain in port. They shall also complete an application and submit it in writing within 24 hours to the Coast Guard COTP to remain in port.
- **X-RAY:** A readiness condition in which gale force winds are possible within 48 hours. Vessels of more than 500 gross tons and ocean-going barges and their supporting tugs should make preparations to leave the port or have received permission from the Coast Guard COTP to remain in port.
- **YANKEE:** A warning condition in which gale force winds are possible within 24 hours. During Port Condition YANKEE all affected ports are under USCG vessel traffic control measures where the captain of the port restricts/controls all vessel activity. All vessels greater than 500 gross tons and ocean-going barges and their supporting tugs with permission to remain in port should make their final mooring arrangements.
- **ZULU:** A dangerous condition in which gale force winds are possible within 12 hours. In Port Condition ZULU the port is closed, and all port operations are suspended except for vessel movements and activities specifically authorized by the Coast Guard COTP

Vessel Status:
