## TransPacific Services Update - EC5: Reinstatement of Savannah Port Call

**Dear Valued Customers,**

This is to provide update to the Schedule Recovery Measures that were in place on TransPacific Service **EC5**. As outlined below, a number of changes were previously implemented on this string in order to properly recover schedule integrity.

We are pleased to announce that the bypass of the **Port of Savannah** on EC5 is scheduled to conclude. **The graph below details the first EC5 voyage that will again include Savannah in its US East Coast rotation.**

At this time, there is no change to the Omission of Halifax Westbound call, or the addition of New York (Westbound) Call on EC5. We will provide further updates on these changes as more information becomes available.
